

EJBCA SaaS PKI by PrimeKey

The full power of EJBCA without the need for underlying administration

Hosted. Managed. Secure.

EJBCA SaaS will provide you with the full power of EJBCA Enterprise, but without the need for managing the underlying infrastructure. Set up your instance on AWS and we will take care of hosting as well as up time SLA.

EJBCA SaaS

The full power of PrimeKeys flexible PKI software EJBCA Enterprise is now available as a Service in the Cloud. Enjoy the possibilities of advanced PKI without the headache of handling the underlying administration.

Installing and maintaining a full blown PKI requires a lot of administration and management. Any Certificate Authority, such as EJBCA, relies on a robust technology stack and as always when security is in focus, there is a constant need of maintenance and updates. With EJBCA SaaS you don't need to worry about that. We offer you a full blown PKI but without the need for managing the underlying infrastructure. EJBCA SaaS reduces your internal need for management and allows you to focus on your core business, whilst assured the highest level of security. Own your PKI but let us take care of the underlying infrastructure.

EJBCA SaaS gives you full access to the advanced functionalities and abilities of EJBCA, something you normally won't get with PKIaaS solutions. You can set up complex PKI use cases with large number of certificates, any number of CAs and support multiple use cases. With EJBCA SaaS you are in full control of setting up your profiles, your protocols and configuring your PKI. The solution will provide you with the power of one of the most flexible and robust PKI products out there - in a SaaS deployment.

Highlights

- Fully featured EJBCA
- Secured availability with SLAs
- PrimeKey manages the underlying technology stack
- Choose your preferred HSM, AWS KMS or AWS CloudHSM (available soon)

Setting up your instance does not require any dealings with PrimeKey sales but is something you are able to do by yourself, right now. Simply choose your subscription, sign up on AWS, configure your instance and you are good to go.

EJBCA SaaS is available in different subscription models and you can choose which ever suits your business requirements best. With freedom and flexibility you are able to grow over time, enabling even the most complex PKI solutions to benefit from our SaaS offering.

EJBCA SaaS offers you dashboard and reports to help you get an easy overview of the health of your PKI solution. This gives you full service transparency.

Need any help? We have open and free quick start guides, how-to's and product documentation for you to take part of, as well as 24/7 support services and skilled PKI professionals to assist with any questions you may have.

Reporting services examples

- PKI health status
- Certificates generated, per month and day
- 24 hour chart showing certificate generation trends
- Number of certificates generated by profile
- Certificates about to expire over the next 30/60/90 days

Getting started has never been so easy
